BAYGARD® BCS

Usually, we try to create new and unique products with surprising features. But this time, we simply listened to our customers. Many of our clients were looking for a cost-efficient though effective alternative to the current BAYGARD® range. So, we took those demands as our starting point and created BAYGARD® BCS: the no. 1 cost-effective water and oil repellent with great performance.

The place of BAYGARD® BCS in the BAYGARD® range

The current products in the BAYGARD® range, like BAYGARD® Clean, are all high-end finishes known for their ability to protect textiles against water and oil. With BAYGARD® BCS we launch a full-scale product that is more price-competitive, while still resembling the other products of this range in composition.

Who is this product for?

BAYGARD® BCS focuses on technical applications, making it the perfect product for textile manufacturers working for segments such as:

- Outdoor apparel
- Outdoor equipment
- Home textiles
- Automotive
- Performance apparel & Workwear
- Construction textiles
- Argocultural textiles
- Industrial textiles

Focus on technical textiles

BAYGARD® BCS is built on the proven BAYGARD® technology. This is reflected in its easier handling and better bath stability when compared to products produced by competitive products.

About TANATEX

TANATEX Chemicals breaks new ground with ultramodern textile processing solutions, ranging from pre-treatment to finishing. Through a global network of offices, agencies and distributors, we support our customers worldwide with advanced top quality wet processing products and a high level of technical and tailor-made service. For almost 60 years we have proven to be a trustworthy and innovative associate.

This makes the product particularly useful for applications like:

- Bedding
- Upholstery
- Outdoor upholstery
- Awnings and umbrellas
- Table cloths
- Medical (Uniforms, bedding)
- Sportswear

Application methods

BAYGARD® BCS is used in typical pad-finishing applications, as pre-treatment before coating and as top-finish. Key benefits are:

- High wash durability
- High performance C6-based fluorocarbon
- Optimises process efficiency
- Great handling

Since 2016 we are a company of Transfar Chemicals. Our cutting-edge products are based on the latest trends and demands in today's (technical) textiles and carpet processing industry. We do not sell mere products; we offer fit-for-purpose solutions. With an eco-friendly way of thinking, TANATEX experts are the ones to watch.
