Easy Stretch

FIT FOR FITNESS

When we look for clothes to exercise in, we look for garments that fit well and look good. Easy Stretch makes sure that your garments have maximum stretch but will always return to their original form. It also meets the highest standards with regard to handle and drape, providing a unique soft and smooth handle. Finally, Easy Stretch is suitable for all types of fibre and all shades ranging from white to black.

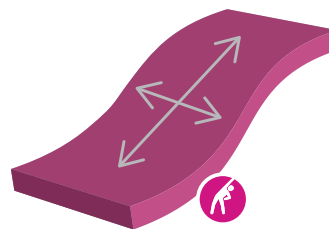

MEASURABLE EFFECTS

TANATEX's scientists have been searching for a long time to find a product that increases elasticity and is more or less fibre-independent. With Easy Stretch the solution is now available. We are able to upgrade knitted textiles in respect to lasting elasticity/stretch and increase the elongation by 20% easily compared to untreated garments. This effect is measurable with standard test methods such as the M&S P14. Testing in cycles proved that this is not a single time effect, but that the increased elasticity lasts for endless stretching. This makes Easy Stretch consumer effective.

PRODUCTS

Easy Stretch concept is based on silicones that attach themselves both deeply into the fibre structure as well as on the surface of the yarn. Combined with TANATEX's unique finishing polymers, durability reaches unprecedented levels.

HOW DOES IT WORK

Stretch your knitwear to the max and it just goes back to its original shape.

ABOUT TANATEX

TANATEX Chemicals develops innovative textile processing solutions, ranging from pre-treatment to finishing. The state-of-the-art products are based on trends and demands in today's (technical) textiles and carpet processing industry. Through a worldwide network of offices, agencies and distributors, TANATEX Chemicals supplies its global customers with quality wet processing products and provides a high level of technical service. For over 50 years, the company has proven to be a reliable partner in solving its customers' challenges providing them with competitive advantages and fit-for-purpose chemical solutions.
