SMART-FIX

CREATE THE LATEST FASHION

Whether you are looking for a grey cast, a deeper shade, a high contrast or definition or a 'salt and pepper' effect, SMART-FIX is the answer. SMART-FIX is an innovative process and a unique way to treat denim leading to new enriched appearances. It is the perfect way to create new fashion trends on jeans. The SMART-FIX treatment can also be used on stretch denim containing elastane and other fabrics.

KEEPING A SOFT HANDLE

Next to the visible effects that can be achieved, SMART-FIX has substantial other effects on the fabric or garment. They maintain their soft handle and have a dry, non-sticky touch. The concept will improve the rub fastness and wash resistance and has a positive effect on the tear strength. The dimension stability will improve substantially without losing handle. Finally, the concept contains no formaldehyde and has no negative effect on post-treatments like abrasion or softening.

PRODUCTS

The SMART-FIX concept is composed of a synergetic mixture of tailored water based polyurethanes and additives. It can be applied as coating, finishing or spray. The latter is typically used for partial garment effects.

HOW DOES IT WORK

Lock-in the indigo and sulphur, maintaining the new appearance of dark raw denim.

ABOUT TANATEX

TANATEX Chemicals develops innovative textile processing solutions, ranging from pre-treatment to finishing. The state-of-the-art products are based on trends and demands in today's (technical) textiles and carpet processing industry. Through a worldwide network of offices, agencies and distributors, TANATEX Chemicals supplies its global customers with quality wet processing products and provides a high level of technical service. For over 50 years, the company has proven to be a reliable partner in solving its customers' challenges providing them with competitive advantages and fit-for-purpose chemical solutions.
