To whom it may concern

Ede, 12 January 2017

Subject: The Candidate List of substances of very high concern (SVHCs)
for authorisation

Dear Sirs,

On the 12th of January 2017, the European Chemical Agency (ECHA) has published in their Press Release (ECHA/PR/17/02) that 4 new substance(s) will be added to the candidate list of Substances of Very High Concern (SVHC), now containing 173 substances.

We have carefully checked all our products which are currently produced on the presence of any of the 173 substances as raw material or known impurity. TANATEX Chemicals B.V. can inform you that the substances which are listed on the candidate list of Substances of Very High Concern (SVHC) under EU regulation 1907/2006/EC (REACH regulation), are not expected to be present or exceeding the appointed limit of 0.1 %.

The actual list of substances which are on the candidate list or have been included in annex XIV can be found on the ECHA site (<https://echa.europa.eu/candidate-list-table>).

This information is based on our knowledge of the product at the time of publication of this statement and applies to the material as it leaves our production facilities and does not cover any additive, pigment, etc., subsequently used or added by the user (or a third party).

We trust that this information is sufficient. If you have any further questions, please do not hesitate to contact us.

Kind regards,
TANATEX Chemicals B.V.

Fred Schmitz
